

What you need:

- 6 Newspaper pages
- sellotape

Maker{Challenge}

News Towers

Age: 4 yrs +
Risk: low

{Challenge}

What is the tallest free standing tower you can make out of only 6 newspaper pages?

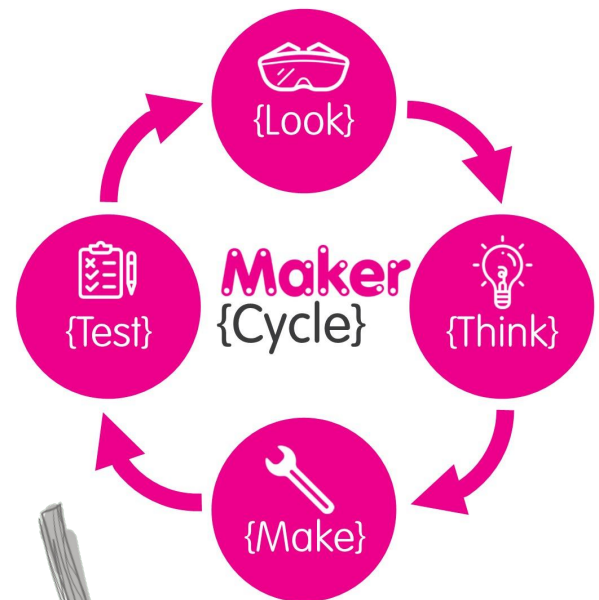

What you need

- 6 Newspaper pages
- sellotape

Use the Maker{Cycle} to create like a Maker:

- **Look** at your 6 sheets of paper and **think** about how to best use them to make the tallest tower possible.
 - Remember it has to be able to stand without any support!
 - Why not draw some of your ideas on paper first.
 - Start testing out different ways to fold or roll your news paper pages. How can you make the longest and strongest shape possible?
- **Make** your tower. Why not compete against your family members!
- **Test** your tower out to see if it can stand on its own. How tall did you manage to make it? Use the Maker{Cycle} to keep improving your ideas.

{Top tip}

Rolling newspaper into tubes is a good way to make it stronger. Try rolling it diagonally from one corner.
